**Observation:**

There is no Infestation of Insect Pest reported Above ETL during Pest Scouting of Rice Crop for the 2ND Week of June, 2021 However some spots of Borer & Toka Below ETL were observed along with the incidence of Foot Rot Disease. Keeping in view the environmental conditions, there is a chance that the infestation of insect pest along with the incidence of diseases may intensify in coming days so there is a dire need to have a close look on pest situation for timely management.
