Observation:

The Infestation of Toka was observed Above ETL during Pest Scouting of Rice Crop for the 3RD Week of June, 2021 However some spots of Borer, Leaf Rollar & Toka Below ETL were observed along with the incidence of Sheath Blight and Blast Diseases.Keeping in view the enviromental conditions, there is a chance that the infestation of insect pest along with the incidence of diseases may intensify in coming days so there is a dire need to have a close look on pest situation for timely management.
